## WORK EXPERIENCE

### APISERO | SENIOR SOFTWARE ENGINEER

Pune, MH | Dec 2021 – Present

- **Salesforce Developer.** Developed a POC project which helped to strengthen Salesforce Admin and Developer concepts(Apex, Trigger, Batch Apex, LWC). Developed a CPQ clone from scratch.
- Experience in designing Custom Objects, creating fields and relationships, validation rules, page layouts, record types and data security model.
- Developing efficient code using Apex classes, Apex triggers, Batch Apex and Async Apex, Test classes wherever necessary.
- Creating workflow rules, process builders, flows and approval process.
- Developing Lightning Web Components(LWC) by using JavaScript, Lightning Message Service(LMS), Lightning Design System(LDS).

### CERNER | SOFTWARE ENGINEER 1

Bengaluru, KA | Jul 2019 - Nov 2021

- Used Salesforce.com to build POC(proof of concept) projects.
- Implemented OAuth2, uplifted from jersey 1.x to jersey 2.x, removed security vulnerabilities(CVEs), fixed defects/bugs, uplifted project by removing all old dependencies and replaced them with latest ones and worked on building API in a Jersey(Java Framework) application for the Department of Defense(DoD) and Veteran Affairs(VA) of the United States Government. Also worked on a Sweden deployment for the same project.
- Worked on an Enterprise Java application. Implemented circuit breaker functionality using resilience4j.
- Implemented API for pagination, filtering and sorting using Ruby on Rails.
- Developed frontend single-page CRUD applications using ReactJS(React Hooks, React functional components).
- Provided support to clients who used our platform.
- Used agile software development and methodologies.
